

# Green Earth Tank instructions

## step 1

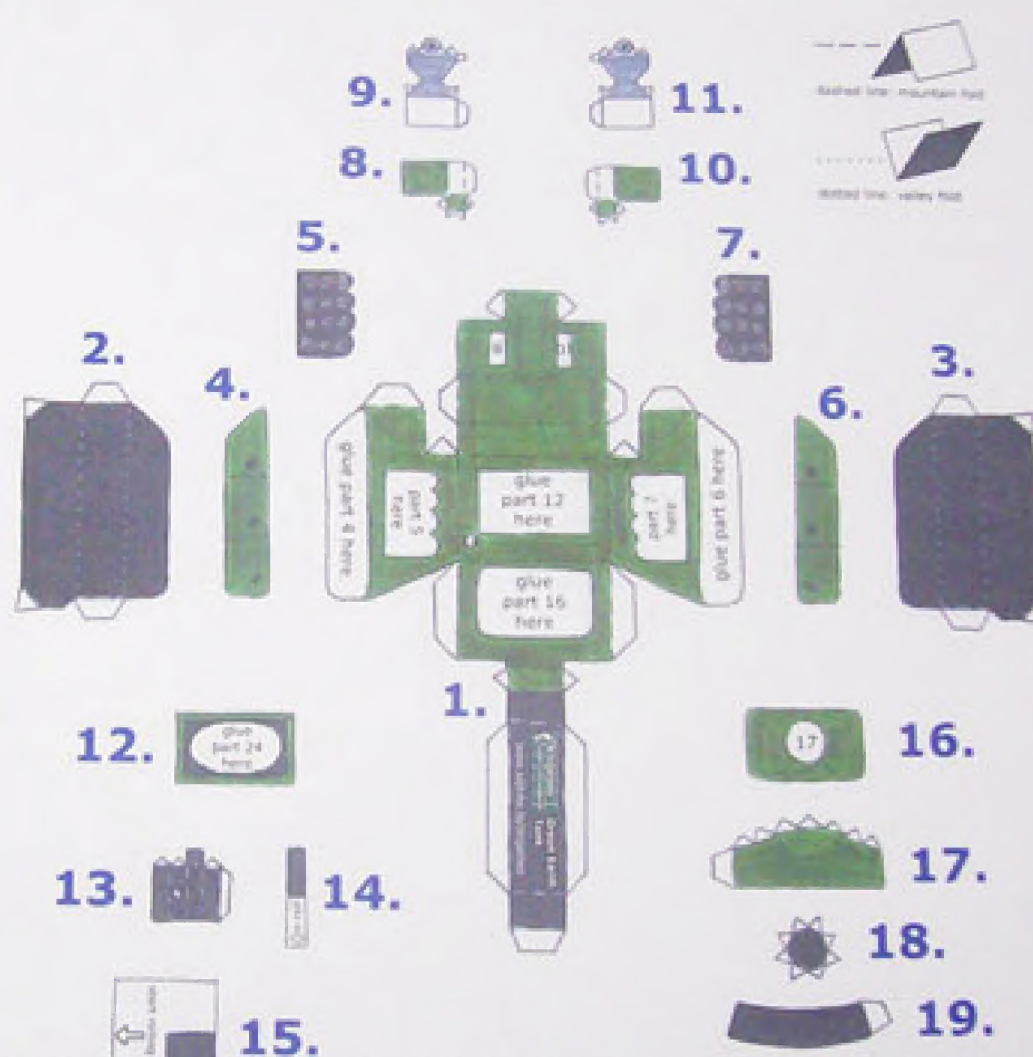

### Green Earth Tank

In the 2001 Game Boy Advance turnbased strategy game Advance Wars, Tanks are one of the most versatile units available to you.

Their high movement rate means that they can quickly advance on the enemy and keep them occupied while your slower moving MD Tanks or Rockets move in for the kill. Or just let them finish the job themselves, of course... :D

game site: <http://www.advancers.com/>

Print the parts on thicker paper (I use 200 gsm paper) and get out your papercrafting tools!

## step 2

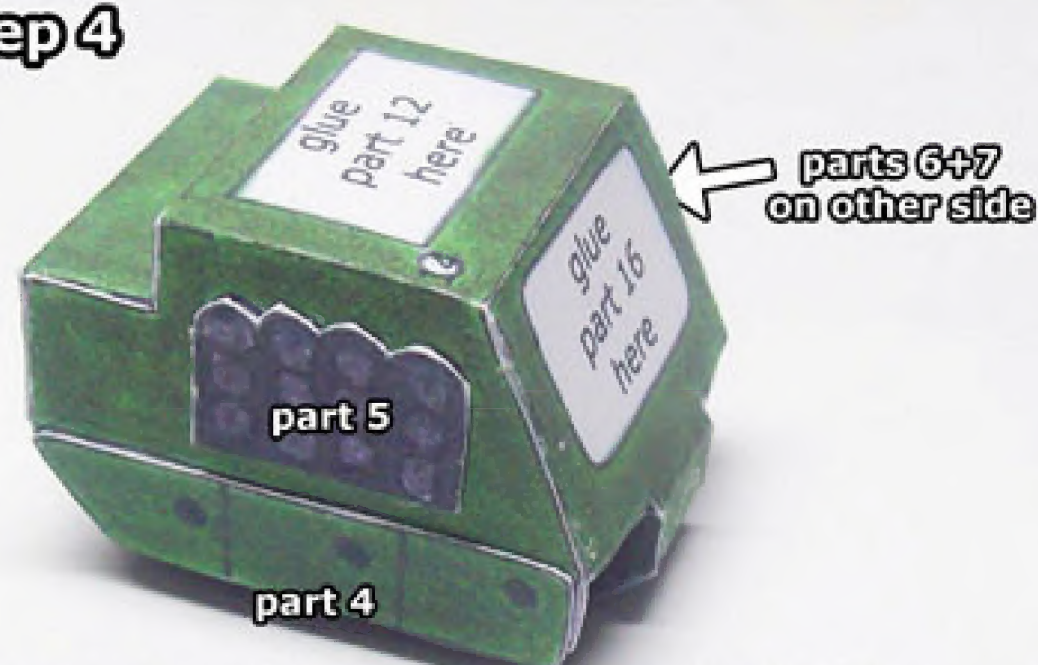

Score all the folds on part 1 so you can easily assemble it in the shape you see here.

## step 3

Cut out parts 2 and 3, fold them into a "U" shape, and then glue them underneath part 1.

## step 4

Cut out parts 4-7 and glue them on as indicated on part 1.

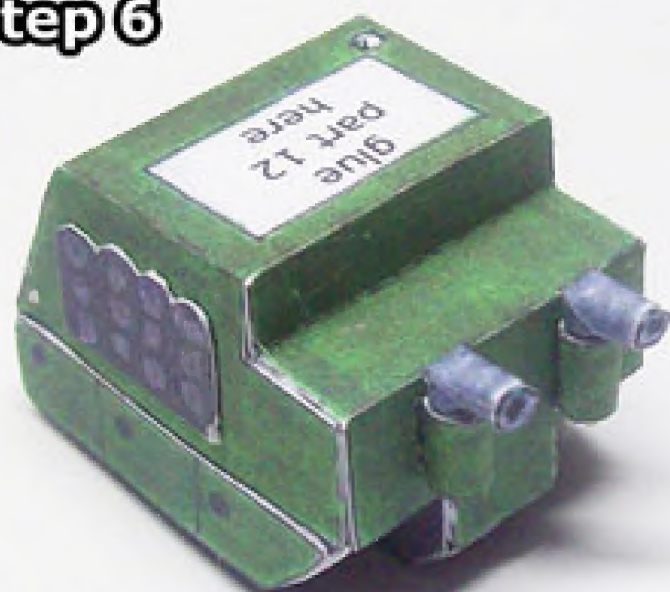

## step 5

After glueing part 9 into two sections of tube, fold it to create an "L" shape. Push the bottom part into the tube of part 8. Do the same for parts 9 and 10.

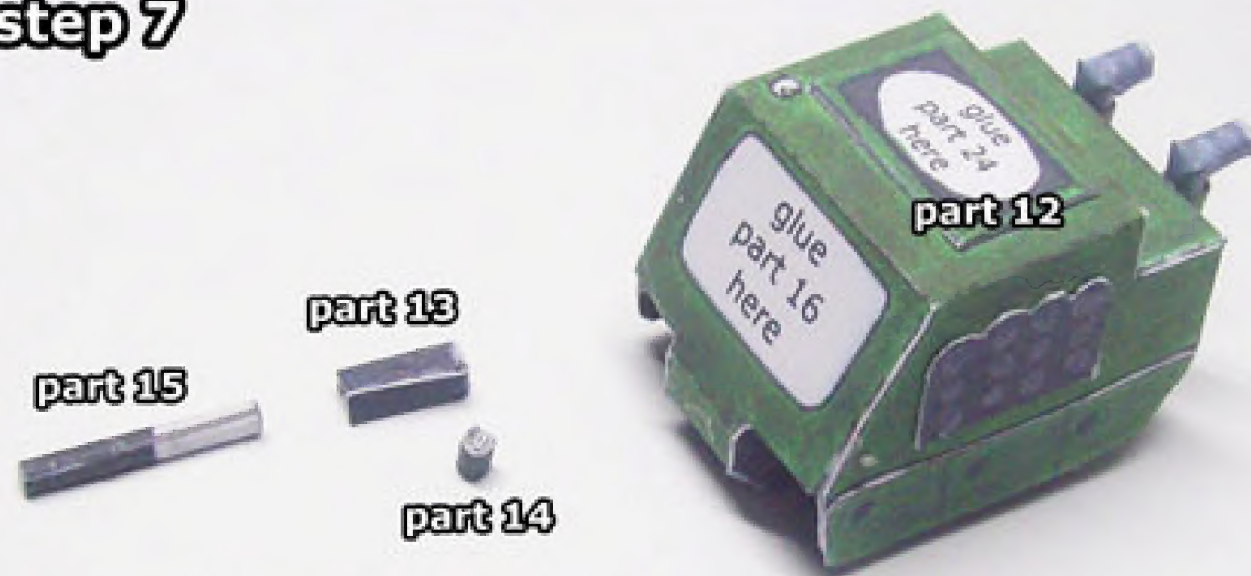

### step 6

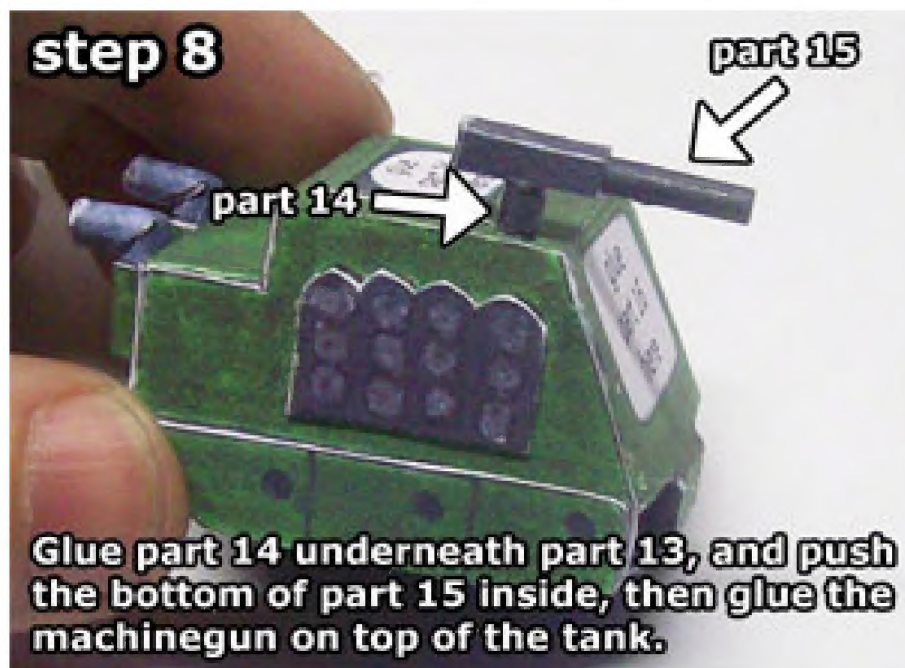

Glue both exhaust pipes to the back of the tank.

### step 7

Glue part 12 on top of the tank, then assemble part 13 and roll up parts 14 and 15 as tight as possible.

### step 8

Glue part 14 underneath part 13, and push the bottom of part 15 inside, then glue the machinegun on top of the tank.

### step 9

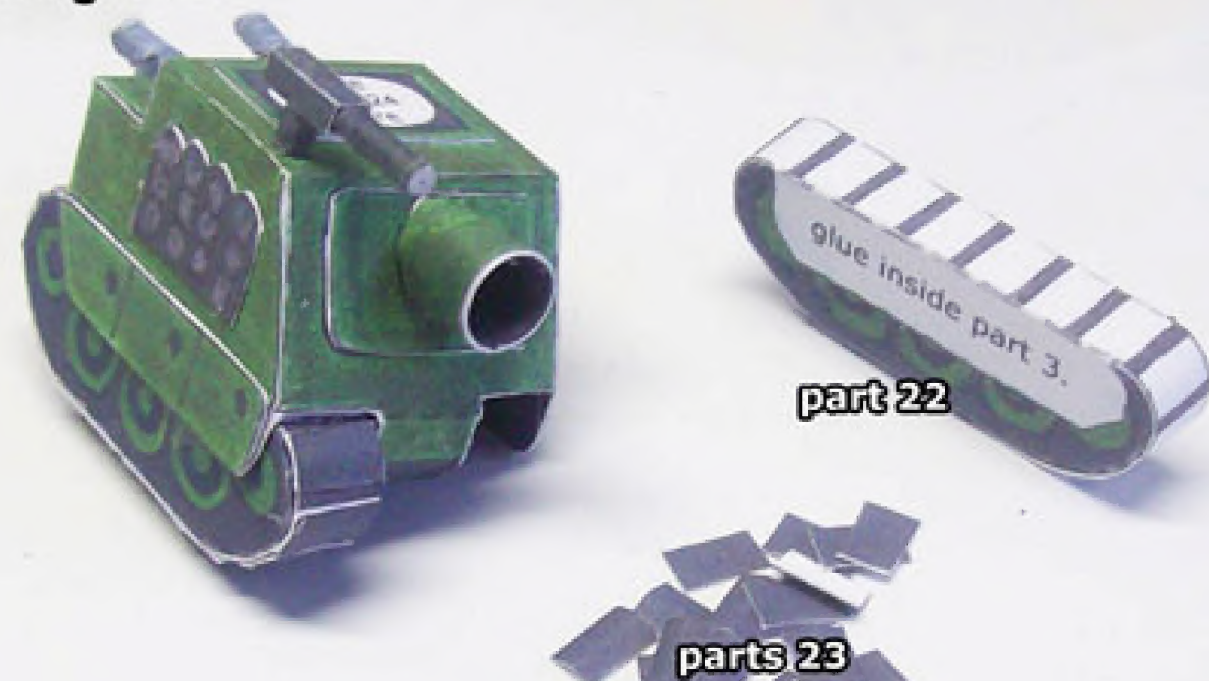

Glue part 16 to the front of the tank, then cut out and glue together parts 17-19 (part 19 with the coloured side in!)

### step 10

Glue part 18 to the bottom of part 19, then glue both parts inside part 17 together.

### step 11

Pre-shape some of the parts 21 to glue them onto the curved parts of part 20. Then glue the tread underneath the hull. Do the same for parts 22 and 23.

### step 12

Cut out and assemble parts 24-29 as you see here...

### step 31

...then cut out and assemble part 30. Sandwich the small glueing tabs on the front between part 31.

### step 14

Finally, glue all the parts together on top of the tank. Thank you for building a Ninjatoes' papercraft model!
